

Cambridge NeuroWorks

WE ARE SEEKING BOLD THINKERS TO REVOLUTIONISE NEUROTECHNOLOGY

- **Cambridge NeuroWorks** is a new three-year, multi-million-pound collaboration with Advanced Research + Invention Agency (ARIA) in the Scalable Neural Interfaces Opportunity Space, as part of ARIA's Activation Partner programme .
- **Our mission** is to address some of the most pressing neurological and mental health challenges, including depression, dementia, chronic pain, and brain injury, by overcoming barriers to accelerating the translation of bold ideas into investable propositions and real-world therapies.
- **Our programme is designed to catalyse** the translation of ideas by engineering serendipity, providing world-class mentorship and 'What If' ideation processes, awarding Blue Sky proof-of-concept project funding, providing business training, and awarding Fellowships to bold thinkers from across the UK.

DEVELOPED IDEA, SEED OF AN IDEA, OR FINDING YOUR IDEA

- We are already launching the **Cambridge NeuroWorks Fellowship Programme** and encourage applications from all backgrounds ('neurotech' or not), from anywhere in the world
- **Two types of Fellowships** depending on stage of your idea, and you will access some of the best Cambridge can offer:
 - a. **Blue Sky Fellowships** if you have speculative hypotheses and need the freedom to explore possibilities
 - b. **Frontier Fellowships** if you have a proof-of-concept idea and want to turn it into real-world solutions
- **Fellowships are just the beginning**; join the community to be the first to access our extensive network through physical events and virtually on **Connect: Health Tech**, 'What If' ideation cycles, Blue Sky proof-of-concept funding opportunities, mentorships, job opportunities, and more as soon they are available - to find & develop that winning idea!
- Cambridge NeuroWorks is committed to **Founder-friendly IP**

22 Cambridge and pan-UK events + symposia

Up to 15 months of 'What if' cycles planned; full- & part-time **15**

8 Blue Sky Proof-of-concept project funding opportunities from July 2025

Cost of being part of this community - incl. attending events! **0**

18 Planned 12mth Fellowships, 6 available now

Approx. £117k grant for living, consumables, lab fees etc. **117**

17/01 2025 Fellowship applications close for the first cohort

 **Become part of our community**

 **Apply for a Fellowship**

1. Cambridge NeuroWorks brings together nine partners from across Cambridge.
 2. ARIA is an R&D funding agency created to unlock technological breakthroughs that benefit everyone.
 3. All figures quoted, over programme life
